

TROPICAL CYCLONE BULLETIN NO. 30

Typhoon "FABIAN" (IN-FA)

Issued at 11:00 PM, 23 July 2021

Valid for broadcast until the next bulletin at 5:00 AM tomorrow

TYPHOON "FABIAN" WEAKENS AND IS NOW ON ITS CLOSEST APPROACH TO MIYAKO ISLANDS

| | |
|--|--|
| Location of Center (10:00 PM) | <p>Track of Typhoon "FABIAN" {IN-FA}</p> |
| The center of the eye of Typhoon "FABIAN" was estimated based on all available data at 560 km Northeast of Itbayat, Batanes (24.9°N, 125.0°E) | |
| Intensity | |
| Maximum sustained winds of 140 km/h near the center, gustiness of up to 170 km/h , and central pressure of 960 hPa | |
| Present Movement | |
| North Northwestward at 10 km/h | |
| Extent of Tropical Cyclone Winds | <p>Philippine Atmospheric Geophysical and Astronomical Services Administration</p> |
| Strong winds or higher extend outwards up to 620 km from the center | |

TRACK AND INTENSITY FORECAST

TROPICAL CYCLONE BULLETIN NO. 30

Typhoon "FABIAN" (IN-FA)

Issued at 11:00 PM, 23 July 2021

Valid for broadcast until the next bulletin at 5:00 AM tomorrow

| TROPICAL CYCLONE WIND SIGNALS IN EFFECT | | | |
|---|----------------|---------|----------|
| TCWS No. | Luzon | Visayas | Mindanao |
| 1 (Strong winds prevailing or expected within 36 hours) | Batanes | - | - |

| HAZARDS AFFECTING LAND AREAS |
|---|
| <p>Heavy Rainfall</p> <ul style="list-style-type: none"> "FABIAN" is unlikely to directly bring heavy rainfall in the country throughout the forecast period. Under the influence of the Southwest Monsoon being enhanced by "FABIAN", scattered to widespread monsoon rains will be experienced in the next 24 hours over Ilocos Region, Cordillera Administrative Region, Metro Manila, most of Central Luzon, CALABARZON, and MIMAROPA, and portions of Western Visayas. More information is provided in the Weather Advisory #15 for Southwest Monsoon issued at 11:00 PM today. <p>Severe Winds</p> <ul style="list-style-type: none"> Strong winds (strong breeze to near gale conditions) will be experienced over Batanes. Occasionally gusty conditions associated with the enhanced Southwest Monsoon will be experienced over Visayas and the rest of Luzon, especially in the coastal and upland localities of these areas. |
| HAZARDS AFFECTING COASTAL WATERS |
| <p>In the next 24 hours, under the influence of the enhanced Southwest Monsoon and Typhoon "FABIAN":</p> <ul style="list-style-type: none"> Rough to very rough seas will be experienced over the seaboard of Luzon (including the areas under TCWS #1) and the western and central seaboard of Visayas. Sea travel is risky for small seacrafts over these waters. Mariners without the proper experience should immediately seek safe harbor. For more information, see the Gale Warning #8 issued at 5:00 PM today. Moderate to rough seas will prevail over the remaining seaboard of the country. Mariners of small seacrafts are advised to take precautionary measures when venturing out to sea. Inexperienced mariners should avoid navigating in these conditions. |
| TRACK AND INTENSITY OUTLOOK |
| <ul style="list-style-type: none"> "FABIAN" is forecast to exit the Philippine Area of Responsibility in the next 3 to 6 hours. The typhoon is forecast to gradually accelerate while moving generally northwestward over the East China Sea. On the forecast track, "FABIAN" may make landfall in the vicinity of eastern mainland China on Sunday afternoon or evening. "FABIAN" is forecast to maintain its strength and remain within typhoon category until Sunday morning. Afterwards, gradual weakening is expected as the typhoon moves closer to the China coast. "FABIAN" is forecast to be downgraded to severe tropical storm category as it makes landfall over eastern China. Rapid weakening should follow post-landfall as "FABIAN" moves inland, eventually leading to its degeneration into a remnant low by Tuesday evening. |

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless an intermediate bulletin is released, the next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
